MADE IN GERMANY

zambelli

METAL AT ITS MOST BEAUTIFUL.

RIB-ROOF METAL ROOFING SYSTEMS & ZAMBELLI SIDING

EINFACH MACHEN. AUS METALL.

FUNCTION, COVERED. SINCE 1977.

Franz Zambelli Sopalù († 2015) laid the foundation for an extraordinary company history in 1957 as a craftsman. In 1977, the introduction of the RIB-ROOF 465 marked a milestone: the innovative metal roofing system with sliding-seam technology. For the first time, it enabled the cost-effective realization of large-scale projects – and marked the beginning of today's building-envelope business segment.

What has always characterized Zambelli isn't just technology: courage, enthusiasm, and the drive to think ahead. The handstand of our founder has become a symbol of our mindset – always in balance, driven by passion. Zambelli is a family-owned business with character. Our products are created with skill, expertise, and modern technology. For decades – and for the future.

EINFACH MACHEN. AUS METALL.

WITH HEART AND MIND

No two projects are alike – but each of them demands reliability. Roofs protect assets, technology and people – day in and day out, in all weather conditions. That requires systems that deliver on their promises.

As a traditional company with nearly 50 years of experience, Zambelli stands for quality, trust, and solutions that perform. With passion and expertise, we support our partners from planning through execution – so that every building, from small projects to large-scale developments, stands the test of time.

Welcome to Zambelli.

HERE FOR YOU FROM DAY ONE.

SERVICE IS OUR TOP PRIORITY

Questions about products or projects? Our experts provide fast, reliable support – personal, direct, and backed by in-depth technical know-how. We deliberately rely on short communication paths, clear coordination, and true accessibility, because we understand how critical dependable information and swift solutions are in day-to-day business.

For us, service is more than an add-on to the product. It is a core element of our quality promise to our partners.

WHEN METAL TAKES SHAPE.

EFFICIENT AND ESTABLISHED. FOR PROJECTS OF ANY SCALE.

Zambelli RIB-ROOF metal roofs define spaces and open up new design freedom. Penetration-free installation ensures permanently watertight roof surfaces – without visible fasteners. From expansive roofscapes or compact structures, RIB-ROOF delivers precision, durability and flexibility, creating limitless possibilities with solutions built to last.

The RIB-ROOF metal roofing system is field-proven and provides architects, planners, and installers with confidence. With Zambelli's technical support, even complex projects become clearly structured processes.

Whether refurbishment or new construction: Zambelli RIB-ROOF is suitable for all common roof assemblies and meets the highest performance requirements.

Profile panels can be produced directly on site in the required lengths – from eave to ridge. A solution that excels technically and makes a strong visual statement, especially for demanding architectural projects.

Manufactured on Zambelli's own roll-forming lines in Germany, with ETA approval and FM certification – tested, certified, and recognized worldwide.

ZAMBELLI RIB-ROOF EXPLAINED IN 3 MINUTES

RIB-ROOF MAKES THE DIFFERENCE

Well-engineered details and a quality that proves itself every day — on small builds and major projects alike.

- **Fast, secure installation**
  Sliding clips ensure a penetration-free roof: permanently watertight surfaces and reduced construction time.
- **Flexible design options**
  Variable lengths, shapes, and colors for virtually any project.
- **Durable quality**
  Zambelli's metal expertise, proven across construction projects of every size.
- **Planning and technical support**
  Zambelli supports you with technical advice and project-specific documentation. Clear planning processes ensure a safe, efficient execution.

FOR IDEAS THAT WORK.

RIB-ROOF by Zambelli is the metal roofing system for precision construction. It combines proven engineering with architectural freedom to deliver reliable results – today and tomorrow.

FAST, SECURE, PENETRATION-FREE

Sliding clips are pivoted into place and fastened – intuitive, penetration-free installation. The system allows rapid, joint-free installation starting at roof pitches as low as 1.5°, ensuring rainproof surfaces and efficient workflows.

PLANNING AND CONSULTING

From concept to completion: CAD details, tender documentation and technical advice provide confidence at every project stage. Decades of experience deliver cost-effective, precise solutions.

COMPLETE ACCESSORY RANGE

A comprehensive portfolio of accessories enables fully penetration-free installation for secure, long-lasting roof solutions.

SHAPES FOR EVERY VISION

Straight, tapered, curved or combined: RIB-ROOF offers a wide variety of profile shapes, including custom widths. Even complex geometries can be executed with precision.

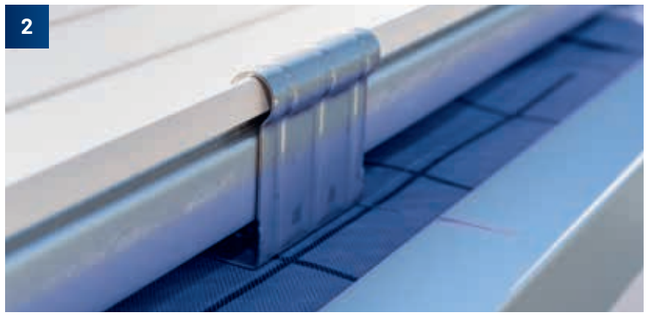
SUSTAINABLE AND REUSABLE

Durable, recyclable and resource-efficient. Non-destructive disassembly and re-installation allow reuse – a clear benefit for sustainable building concepts.

CUSTOM-MADE – EVEN ON SITE

Panels are manufactured project-specific, optionally directly on site using mobile roll-forming machines. This allows virtually unlimited lengths, reduced transport effort and accuracy on large projects.

ENGINEERED FOR SIMPLICITY.



With RIB-ROOF, valuable installation time is saved. The profiled panels are simply pivoted into the system clips – no pre-assembly, no seaming or rework required.

The particular advantage of RIB-ROOF metal roofing systems is their systematic installation, which offers clear benefits for planning, project execution and roof function. Despite visual differences, each system follows a consistent design: functional, installer-friendly and designed for efficiency.

1. **Position and fasten the first row of clips**
2. **Pivot the profile panel into the clips**
3. **Pivot the clips into the profile panel and fasten them onto the substructure**
4. **Pivot the next profile panel in place, and so on**

THE INNOVATIVE RIB-ROOF CLIP SYSTEM

With RIB-ROOF, the profile rib and clip form a structural unit.

- **No pre-assembly required**
  Direct panel-to-clip installation, no pre-installation, no seaming: accelerates construction and eliminates potential errors.
- **Performance through geometry**
  Clip and rib stabilize each other, creating a positive-fit connection without leverage or tilting forces.
- **Long-term roof integrity**
  Penetration-free installation, stress-free thermal expansion, resistant to high wind and uplift loads.

COLOR & METAL. AS UNIQUE AS EVERY BUILDING.

Whether aluminum, steel or special metals: RIB-ROOF offers the full range of modern metal and color finishes. Design without limits, plan without compromise – for architecture with character.

SPEED 500

EFFICIENCY SHAPED.

RIB-ROOF Speed 500 stands for speed, precision and technical strength. Its trapezoidal rib design ensures stability, while its concealed fastening enables quick and secure installation – ideal for large roof areas with a clear architectural language. A roofing system that turns efficiency into form.

- **Trapezoidal rib design for maximum load-bearing capacity**
- **Concealed fastening for clean lines and uncluttered appearance**
- **Self-supporting and walkable**
- **Durable, low-maintenance and reusable**

EVOLUTION

DESIGN MADE TO FLOW.

RIB-ROOF Evolution metal roof system brings motion and elegance to roof design. Its rounded rib profile blends seamlessly with architecture, creating refined accents. A solution for planners who view technology, form and aesthetics as a unity.

- **Rounded rib geometry for harmonious design**
- **Concealed fastening, installer-friendly**
- **Self-supporting and walkable**
- **Durable, low-maintenance and reusable**

SIMPLY COMPLETE.

A comprehensive, system-compatible range of accessories is available for RIB-ROOF. All components allow penetration-free installation – ensuring safe, economical and durable roof solutions.

RIB-ROOF SNOW GUARD EXTENSION ELEMENT LIGHT

The new extension element combines proven stability with optimized material efficiency and a clean, refined design. Its compact construction integrates seamlessly into the roof appearance and simplifies both installation and handling – especially at the eaves and on roofs with photovoltaic systems.

NON-PENETRATING | LONG SERVICE LIFE

RIB-ROOF SOLAR MOUNTS / SOLAR PIPE HOLDERS

Zambelli offers mounting systems and accessories for installing photovoltaic systems on RIB-ROOF metal roofs. All components are precisely matched to the profile geometry and enable a penetration-free, statically tested installation.

NON-PENETRATING | FAST AND EASY INSTALLATION

RIB-ROOF ACOUSTIC ROOF

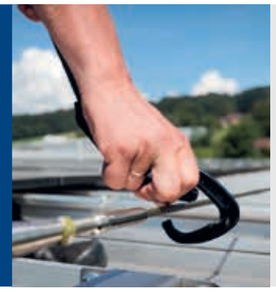
The RIB-ROOF acoustic roof significantly reduces rain noise and improves interior acoustics. A combination of acoustic fleece and an additional sound insulation layer provides effective noise reduction and enhanced comfort – especially in residential buildings, offices or educational facilities.

EFFECTIVE SOUND REDUCTION | REDUCED RAIN NOISE

RIB-ROOF LIGHTWEIGHT SUBSTRUCTURE

The lightweight substructure made of galvanized sheet steel forms the load-bearing base for RIB-ROOF metal roofs. It is lightweight, corrosion-resistant and enables precise slope formation – ideal for refurbishments and modular construction. Suitable for photovoltaic and green roof systems.

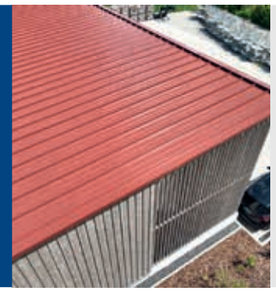
FLAT ROOF REFURBISHMENT SOLUTION | COMPLETE SYSTEM SOLUTION



RIB-ROOF FALL PROTECTION SYSTEMS

As reliable as the system itself: The RIB-ROOF fall protection enhances the roofing system with added safety – penetration-free, retrofittable at any time and certified for tested quality.

NON-PENETRATING | FAST AND EASY INSTALLATION



RIB-ROOF VERGE FINISH

The roll-formed verge finish adds a slim, elegant roof edge to the RIB-ROOF system. The single-piece profile panel allows cost-efficient installation without transverse joints, reducing both material usage and installation time. A solution with a precision fit that is an architectural highlight.

PRECISION-FIT | NO TRANSVERSE JOINTS | CUSTOMIZABLE PANEL WIDTH

THERMO-Z SPACER PROFILE

The Thermo-Z spacer profile is an optional addition for RIB-ROOF metal roofs. It reduces thermal bridges and improves the overall performance of the roof assembly. An efficient solution for consistently high energy requirements.

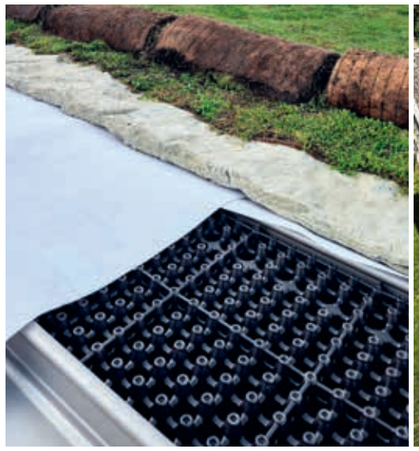
LIGHTWEIGHT CONSTRUCTION | GOOD THERMAL PERFORMANCE

A ROOF WITHOUT LIMITS.

Green roofs unlock functional benefits that would otherwise remain unused. Whether residential buildings, commercial properties, or industrial facilities, green roofing is a smart addition to a wide range of construction projects. Architects and owners benefit alike.

Zambelli keeps it simple. An established, field-tested solution that does more than protect – it actively enhances: Green roofing improves microclimate and comfort. Photovoltaics provide clean energy. Modular, easy to install and engineered to a high technical standard.

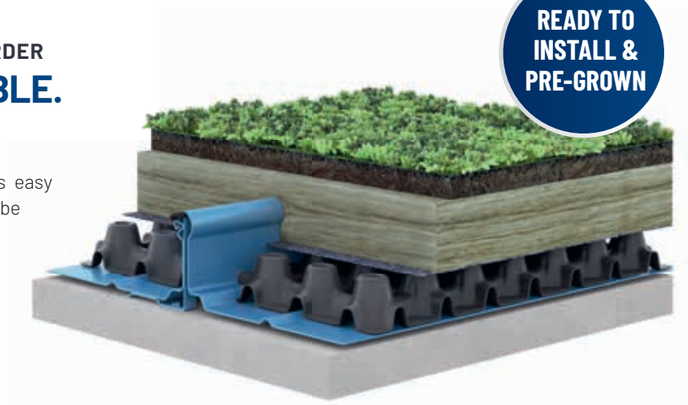
- **Extended service life of the roof**
- **Reduced energy consumption**
- **Noise reduction through sound absorption**
- **High fire resistance**
- **Reduced and delayed stormwater runoff**
- **Active climate protection through CO_2 storage**
- **Additional ecological habitat**
- **Improved air quality**
- **Reduction of surface and urban heat**
- **Low maintenance requirements**



MAKING ROOF SURFACES WORK HARDER

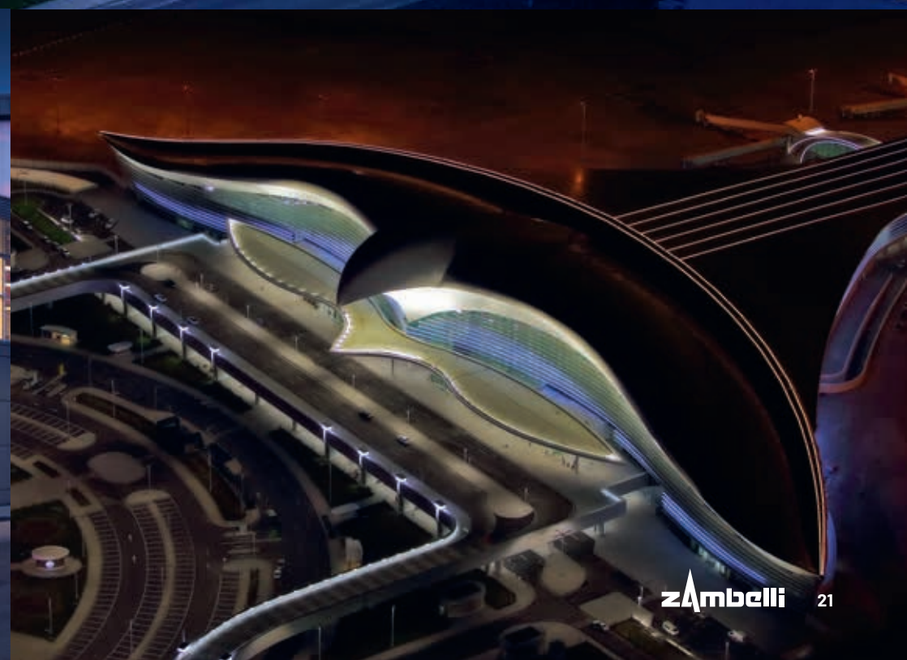
MODULAR. SUSTAINABLE. READY TO GO.

The RIB-ROOF green roof system combines easy handling with durable drainage performance, be it for new builds or renovations. Installation takes place immediately after completion of the metal roof. Thanks to the pre-cultivated vegetation layer, the surface is ready for immediate acceptance – a decisive advantage when timelines are tight.



GET MORE OUT OF EVERY SQUARE METER OF ROOF SPACE

For even greater sustainability, the system can be optionally combined with vertical photovoltaic modules (VPV) by Over Easy. These can be integrated with minimal installation effort and allow for the efficient use of the roof surface for energy generation.



ZAMBELLI SIDING

FACADES WITH CLARITY.

Facades that define architecture – clean lines, precise execution, lasting performance. Zambelli Siding stands for concealed-fastened metal facade elements made of aluminum or steel. The elements are manufactured to exact dimensions and ensure clean, uniform facade appearances without visible fasteners. The result: facade solutions that perfectly combine function and form.

- **Concealed fastening elements**
- **Wide range of colors and surface finishes**
- **Custom-fabricated from aluminum, steel or other metals**
- **Horizontal, vertical or diagonal installation**

PRECISION METAL FACADES.

Zambelli Siding combines engineering and architecture to create clean, uniform facade designs. The panels are manufactured specifically for each project and securely fixed with concealed clips – without penetrations and visible fasteners. Installation is compatible with all common metal or timber substructures.

Developed for ventilated rainscreen facades, the system offers variable panel widths and complete freedom in material, surface finish, and color selection. Whether new build or refurbishment: installation is precise, stress-free, and low-noise – horizontal, vertical, diagonal, or around corners. The elements can also be dismantled non-destructively and reused, supporting sustainable construction practices. The result: metal facade solutions that perform reliably over the long term and are structurally well engineered.

TOMORROW IN MIND.

At Zambelli, sustainability is a lived commitment. RIB-ROOF metal roof systems and Zambelli Siding are made from durable, nearly fully recyclable metals. Manufacturing takes place in Germany under DIN EN ISO 14001 and within the Bavarian Environmental Pact. In 2025, Zambelli was awarded the Bavarian State Medal in Gold for its commitment to protect the environment.

- Our products are listed in the DGNB Navigator. Planners and building owners receive verified material data for safe, documented decisions.
- RIB-ROOF metal roofing systems and Zambelli Siding allow non-destructive dismantling – ideal for refurbishments and building extensions.
- The mobile roll forming machines (optional) produce profiles directly on site, reducing transport.
- Accessories such as solar and green roof systems can be integrated without penetrating the roof surface.

Zambelli. Metal expertise with responsibility.

DGNB Navigator

Listed in the DGNB Navigator. Our systems stand for responsible, sustainable, and future-oriented building solutions.

ZAMBELLI DOES MORE. MUCH MORE.

For decades, Zambelli has stood for well-thought-out solutions, technical expertise and high manufacturing quality. Our products set benchmarks – driven by experience, continuous development and a clear commitment to excellence.

ZAMBELLI ROOF DRAINAGE

For more than 50 years, Zambelli has set standards in roof drainage systems across Europe. From gutters to coils, Zambelli offers a comprehensive product range trusted by the trade. The coated roof drainage system Zambelli COLORDUR® stands for modern design concepts, maximum durability and easy processing.

ZAMBELLI INDUSTRIAL METALWORKING

From cutting to finishing, from single part to assembly: Zambelli covers the entire spectrum of industrial metalworking. Laser cutting, punching, forming, welding, powder coating – all from a single source. With state-of-the-art machinery in four countries, a high level of vertical integration and decades of experience.

ZAMBELLI CARAVANING

Leading motor home manufacturers rely on customized metal solutions from Zambelli: from lightweight parts to doors and complete assemblies. Low weight, precision and proven series quality make our components the first choice in the caravan industry. Quality that travels with you.

ZAMBELLI SHELVING SYSTEMS

From warehouses to offices, from archives to libraries – Zambelli shelving systems combine intelligent functionality with durable quality. Customized solutions, smart details and robust construction ensure safe storage and clear organisation. Because every item belongs in the right place.

ZAMBELLI HEATING TECHNOLOGY

Renowned manufacturers rely on complete solutions from Zambelli – with responsibility for planning, production and installation as well as certified system protection. For energy that arrives – and lasts.
