COLORDUR®

TOUGHER
THAN EVER.
NEVER MORE
COLORFUL.

DESIGN MEETS PERFORMANCE
A SYSTEM FULL OF COLOR.

Zambelli COLORDUR® represents the next generation of color-coated roof drainage systems – engineered for contemporary architectural concepts, maximum durability and easy installation.

Zambelli COLORDUR® is a premium roof drainage system made of color-coated steel that combines design freedom with reliable functionality. It includes all essential components required for a fully functional roof drainage solution. Zambelli COLORDUR® coils and sheet metal panels complete the range for all supplementary work.

This makes Zambelli COLORDUR® not only a solution for classic roof drainage, but also for advanced and customized applications in sheet metal works and roofing trades.

ADDED VALUE FOR PROFESSIONALS

Craftsmen can produce complementary sheet metal components – such as valley and eave flashings, parapet claddings, or chimney surrounds – individually and with precise fit using the same system material. The material is ideally suited for bending, profiling, and proven seam techniques. Identical color and material quality across all

elements ensures a consistent appearance throughout the entire project, with reliable results and no compromises.

TOUGH TO THE CORE

Zambelli COLORDUR® provides elegant performance. A strong steel core is protected against corrosion by a zinc-magnesium coating and finished with a durable color layer. This sophisticated material structure makes the system not only exceptionally resilient, but also a high-quality architectural design element.

OUR BRAND PROMISE

With Zambelli COLORDUR®, we deliver more than premium roof drainage. We provide a well-engineered all-round system – from gutter to sheet metal coil – that unites design, product variety, material quality as well as functionality, and proves itself in everyday professional use.

POWERFUL COLORS FOR A
POWERFUL SYSTEM.

The Zambelli COLORDUR® color range features seven modern shades – offering design freedom with system consistency.

 BLACK ~ RAL 9005	 GRAY ~ DB 703	 WHITE ALUMINUM ~ RAL 9006
 DARK BROWN ~ RAL 8019	 CHOCOLATE BROWN ~ RAL 8017	 ANTHRACITE ~ RAL 7016
		 COPPER BROWN ~ RAL 8004

SYSTEMATIC EVOLUTION

Zambelli COLORDUR® builds on the proven strengths of the "Zambelli Meister System Robust", enhanced by targeted improvements in processing, durability, and design flexibility.

- ✓ **More durable color coating:**
Increased coating thickness (35 µm instead of 25 µm)
- ✓ **Additional protective performance:**
Improved mechanical and chemical resistance of the color coating
- ✓ **Enhanced formability:**
Easy-to-work steel with zinc-magnesium corrosion protection
- ✓ **Refined appearance:**
Textured, matte surfaces and contemporary color palette

WHY ZAMBELLI COLORDUR®

DURABLE COLOR.

CONVINCING PERFORMANCE.

Zambelli COLORDUR® stands for a long-lasting, color-coated steel roof drainage system that combines contemporary architectural requirements with functional strength and sustainable thinking.

MODERN COLOR FINISHES

 Zambelli COLORDUR® impresses with its new, premium surface texture, excellent color stability, and distinctive appearance. Rich, contemporary colors turn functional roof drainage into a visible design feature.

RELIABLE LONGEVITY

 The combination of a corrosion-protected steel core, zinc-magnesium coating, and a robust, double-sided color coating ensures maximum durability. Even under intense UV exposure (RUV 4) in coastal environments or industrial atmospheres (up to RC4), the system remains dependable and long-lasting.

SUSTAINABILITY THROUGH MATERIAL CHOICE

 Steel stands out for its stability and excellent energy and environmental balance – both in production and recycling. With Zambelli COLORDUR®, we focus on long service life and responsible use of resources.

SYSTEMATIC DESIGN FOR PROFESSIONALS

 Zambelli COLORDUR® is an intelligent complete system. Almost all system components are manufactured from the same base material to ensure consistent color and material quality. From gutters to sheet panels – everything fits perfectly regarding function and appearance.

FAST AND EASY INSTALLATION

 The intuitive, proven plug-and-connect system makes Zambelli COLORDUR® particularly installer-friendly. It simplifies on-site work and ensures clean, precise results.

COLORDUR®

ZAMBELLI BRAND QUALITY

Zambelli COLORDUR® is our branded system for modern, color-coated steel roof drainage solutions – distinguished by high-quality manufacturing, a modern color concept, and industry standards-compliant product quality.

EASY TO WORK WITH.

SIMPLY PROCESSED

Zambelli COLORDUR® coils and sheet panels can be bent, folded, and profiled with ease – ideal for traditional sheet metal work using double and angular standing seam techniques.

SIMPLY INSTALLED

Zambelli COLORDUR® is designed for ease of use. Proven system logic and plug-in connections simplify on-site installation.

SIMPLY DURABLE

The tough color coating reliably protects against mechanical stress during processing and installation.

SIMPLY COMPLETE

Coils and sheet metal allow for the production of custom components such as eave and valley flashings, verge trims, or parapet cladding – from the same material and in colors perfectly matching the roof drainage system.

SIMPLY HARMONIOUS

Zambelli COLORDUR® efficiently allows cohesive color concepts across the entire building. System components with identical material and color quality ensure a uniform, high-end appearance.

SIMPLY PROTECTED

The steel core is protected against corrosion by a ZM120 coating – even at cut edges, drill holes, and scratches – ensuring long-term resilience even under demanding conditions.

SIMPLY WEATHERPROOF

Whether used in coastal areas, industrial zones, or extreme weather conditions – Zambelli COLORDUR® delivers reliable performance up to corrosion protection class RC4.

SIMPLY FUTURE-PROOF

Long service life, minimal maintenance, a strong environmental profile, and ease of installation make our color-coated steel roof drainage system a sound, long-term investment.

ISO 9001:2015
CERTIFIED

ISO 14001:2015
CERTIFIED

LAYER BY LAYER
**INTELLIGENTLY
ENGINEERED ROOF
DRAINAGE.**

To ensure maximum durability, Zambelli COLORDUR® relies on an intelligent material structure: a strong, easy-to-process steel core forms the foundation. A robust zinc-magnesium coating provides efficient corrosion protection. Our high-adhesion primer ensures optimal bonding with the final color layer, which not only delivers a refined visual appeal but is also highly resistant to environmental influences and surface wear.

TECHNICAL HIGHLIGHTS

Identical material structure on both sides

UV resistance according to RUV 4
(DIN EN 10169)

Corrosion protection up to class RC4
(DIN EN ISO 12944)

Scratch resistance ≥ 35 N

Coils and sheet metal panels made of DX53
steel for excellent formability

STRUCTURE ZAMBELLI COLORDUR® COIL MATERIAL

thickness 35 μ m)

**ONE SYSTEM.
ONE SOURCE.**

Zambelli COLORDUR® stands for brand quality from a single source. In addition to gutters, downpipes and fittings, our system also features coils and sheet metal panels that allow for precise bending, profiling and folding processes. This enables custom solutions for complementary components such as eave and valley flashings, parapet claddings, or chimney surrounds with consistent color and material quality resulting in a harmonious appearance across the entire building.

You have questions about our product range, availability, or specific projects? Our dedicated team provides fast, reliable support – personal, direct, and backed by technical expertise. We deliberately focus on short communication paths, clarity, and real accessibility – because we understand how critical dependable information and quick solutions are in your day-to-day business.
